Sunayan Chaulagain

Student

I am a cybersecurity student with some experience in web application penetration testing, VAPT assessments, and offensive security challenges. I have participated in CTF tournaments and completed practical labs on Hack The Box, TryHackMe, and PortSwigger Web Security Academy. I have also idea of using tools such as Burp Suite, Hashcat, Nmap, SQLMap, and more with a decent understanding of the OWASP Top 10 vulnerabilities. I also have experience writing detailed, professional VAPT reports.

ACHIEVEMENTS

- Participated in multiple Capture The Flag (CTF) tournaments
- Completed labs and challenges on Hack The Box, TryHackMe, and PortSwigger Academy
- Attended Governance, Risk & Compliance (GRC) workshop on corporate security practices

TRAINING/CERTIFICATIONS

- Building Information Security Culture in an Organization with ISMS
Softwarica College of IT and E-commerce / 2025
Attended 4 days workshop related to ISMS(Information Security Management System)

PROJECTS

- Encryption Description Tool
A tool that helps prevent data misuse by encrypting data so that even if stolen, unauthorized users can't access it.
<https://github.com/sunayan88/leencryptoranddecryptor>
- Simple Ransomware
A basic ransomware script that encrypts the contents of a folder and deletes them if certain conditions (like ransom demand) .
https://github.com/sunayan88/simple_ransomware.git
- Logfetcher & Analyzer
A simple tool to fetch logs from the system, save them, and analyze their content.
https://github.com/sunayan88/Log_fetcher_analyzer-.git
